

To the advisory panel:

I want the Post Office to be a public service not a deregulated business. It is an important part of what holds a community together. Most things are already too commercial. The mail is already half advertising but it still serves a very useful purpose connecting people.

Please don't make it profit driven. It is a service which we pay for collectively and deserve to have a say in how it is run. This should be taken to the public for review, not pushed through in the summer holidays when no one is looking!!!

Jean Galt (Beaches/Woodbine)
