

I do not want to see the provision of postal services deregulated. The current system of Canada Post delivering all letters helps to ensure that the rate for letters is affordable no matter where you may live. Privatization will lead to rural isolated areas having to pay more for the basic service to reflect the actual costs of the service. The Canadian system supports the federal system ensuring that all citizens have access to the basic service of letter delivery at a standard rate. Don't change this system.
