

For a start this inquiry is of national interest and should be treated as such not obscured from the public eye.

You should be ashamed of yourselves destroying an established system for gathering and distributing links to every person in Canada like the Oil company's all you can see is the profit in your pocket not how it hurts the poor.

Taking this form of communication away from the poor who cannot afford hi-tech equipment will undermined this once great country lets go 3rd world again we had only just made it out now you can put us back to living like Africans the laughing stock of the 1st world country's look at Canada they cannot afford with all the Taxes they pay a postal service to cover the country.

Go ahead screw us Canadians yet again.!

Mr.G.H.Merfield
