September 2, 2008

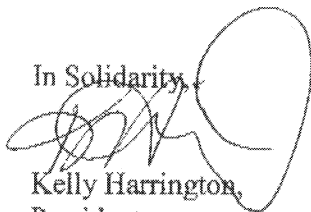

Canada Post Corporation,
Strategic Review Panel
Dr. Robert Campbell, Chairperson

On behalf of the Saskatoon and District Labour Council, I would like to express concern with respect to any sort of deregulation of the Public Post Office. We are concerned that deregulation will lead to a reduction of service(s), or diminished quality of service, as well as a higher cost to consumers. We are also very concerned that this initiative, or the results of your strategic review, may possibly destroy decent jobs in our community. Your employees provide a trusted and valued service to the community and any attempt to privatize this service is strongly objected to. As Citizens, we have come to depend on Canada Post to provide an efficient, quality postal service and we want it to remain that way.

The Saskatoon and District Labour Council values our publicly administered and funded, dependable service we currently have in place. We rely on the security and privacy of the mail and strongly encourage you to maintain our public system. Further, on behalf of the dedicated postal workers who live and work in our community, we encourage you to consider the impact your decisions will have on their lives and hope that you will recognise the valuable contribution they make to your organization and to the community at large.

The Saskatoon and District Labour Council represents over 20,000 workers in the Saskatoon and District area.

In Solidarity,

Kelly Harrington,
President

Saskatoon and District Labour Council
